

PETOSKEY ROBOTICS

ENGINEERING THE FUTURE

Public Schools of Petoskey is proud to open FIRST Lego League (elementary level FIRST Robotics) to k-6 students attending PSP for this fall.

FIRST Lego League's (FLL) mission is "to inspire young people to be science and technology leaders and innovators, by engaging them in exciting mentor-based programs that build science, engineering, and technology skills, that inspire innovation, and that foster well-rounded life capabilities including self-confidence, communication, and leadership." The core values of FLL are Discovery, Innovation, Impact, Inclusion, Teamwork, and Fun. For more information about FLL visit firstinspires.org

There are three levels of FLL:

Discover is for grades K-1

Explore is for grades 2-4

Challenge is for grades 4-6

The number of teams will depend on both student interest and number of adults willing to coach and mentor teams.

Most programs will meet one day a week, either after school or in the evening, typically at the high school. Frequency of meetings may increase for upper levels or as competition dates approach in order to complete projects, prepare presentations, etc. All programs start this fall and most will be done before Christmas Break.

Registration fees are listed below. There are scholarships available to cover ½ of the cost, with additional financial assistance available for families in need.

Registration fees:

Discover is \$15

Explore is \$20

Challenge is \$30

The application for registration **MUST BE COMPLETED BY** September 8. This is [the link](#) to the online application.

There is a random selection process established if applicants exceed spaces available. Contact Tom Ochs (ochs.tf.t@northmen.org or 231.348.2189) to learn more about the selection process.

We are always looking for volunteers - for all programs from K-12. Contact Tom Ochs if interested in more information about volunteering with Petoskey Robotics.
